

ABSTRACT OF THE DISCLOSURE

An improved mounting cup is disclosed for dispensing an aerosol product from a collapsible container within an aerosol container. The improved mounting cup comprises a peripheral rim located in proximity to an outer periphery of the mounting cup for sealing the mounting cup to the aerosol container. A turret is located in proximity to an inner periphery of the mounting cup for receiving an aerosol valve for dispensing the aerosol product from the collapsible container. A mounting surface is located intermediate the peripheral rim and the turret for securing the collapsible container to mounting cup.
